Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Claims 1-34 are pending in this application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 3, 6, 9 and 34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims have been amended to recite an exposing light which is a KrAr or Ar₂ laser. These recitations are considered new matter because they were added to the specification after filing.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 2, 5, 8 and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2, 5, 8 and 33 recite that "said solution is water or perfluoropolyether" which is indefinite since the previous claims referred to a solution including an additive, i.e. basic component. It appears "comprises" would be proper.

Specification

6. The amendment filed January 7, 2004 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The exposing light being "KrAr laser or Ar2 laser".

Applicant is required to cancel the new matter in the reply to this Office Action.

Allowable Subject Matter

7. Claims 1, 4, 7 and 10-32 are allowed. The claims recite an immersion lithography process whereby a basic component is present in the immersion

liquid. Switkes (US 2002/0163629) teaches a process of immersion lithography whereby PFPE is used as the immersion liquid (paragraph 0033). There is no teaching of an additive and paragraph 0049 teaches that the immersion liquid does not interact with the resist which a base would. Hoffnagle ("Liquid Immersion Deep-ultraviolet Interferometric Lithography") teaches a process of immersion lithography. Page 3306, teaches that chemically neutral compounds are such as straight-chain alkanes and cyclic alkanes are used as the immersion liquid. Page 3307 teaches that resists are sensitive to basic contaminants and that the liquid is purified to remove basic components. Neither Switkes nor Hoffnagle teach or suggest the use of basic components in an immersion liquid.

8. Claims 2, 3, 5, 6, 8, 9, 33 and 34 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

9. Any inquiry concerning this communication should be directed to Examiner K. Duda at (571) 272-1383. Official FAX communications should be sent to (571) 273-8300.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff, can be reached at 571-272-1385.
